Technical Knowledge

Software Development
    C#, TypeScript, JavaScript, T-SQL, Visual Basic (VB), HTML, CSS, Ruby

Technologies:
    React, Bootstrap, Angular 2+, Node.js, .NET Core, EF Core, .NET Framework, AWS, Git, Azure, TFS, SVN, Figma, JIRA, Service Now, Visual Studio, SQL Server, IIS, Crystal Reporting, Microsoft Dynamics GP

Professional Experience

Software Developer
May 2022 - October 2023 | Daxko | Birmingham, AL (Remote)
- Contributed to a membership management web application utilizing C#/.NET Framework, Webforms, MVC, React, SQL, and Ruby automated test scripts.
- Expanded functionality and modernized older Webforms pages.
- Worked with UX designers to enhance a customized Bootstrap component library and provide feedback on Figma configuration.

.NET Developer
June 2021 - May 2022 | Kretek International | Moorpark, CA
- Supported an internally built CRM application built using Angular 2, C#, .NET Framework, SQL, and Microsoft Dynamics GP.
- Developed multiple smaller projects utilizing C#/.NET Framework, Angular 2, MVC, and SQL.
- Worked with users to resolve code defects.
- Migrated from an on-premises defect tracker to Jira.

Software Developer (Contractor)
April 2019 - June 2021 | County of Ventura - Public Works Agency | Ventura, CA
- Supported various web applications utilizing C#/VB .NET Framework, C#/.NET Core, Azure, MVC, Angular 2, Entity Framework, and SQL.
- Worked with customers directly to gather requirements, refine user stories, and convert to technical tasks.
- Manually deployed and implemented applications and databases.
- Migrated to Azure DevOps CI/CD pipelines as deployment needs increased.

App Developer (Contractor)
October 2018 - April 2019 | Bank of America | Westlake, CA
- Contributed to a Mortgage console application utilizing C#, C++, and SQL.

Software Engineer
August 2012 - October 2018 | ATIMS | Chatsworth, CA
- Maintained a legacy JMS web application utilizing VB/.NET Framework and Webforms.
- Developed a new JMS web application utilizing C#/.NET Core, EF Core, and Angular 2.
- Transitioned SQL architecture scripts into an Entity Framework Core project.
- Designed Crystal Report templates.
- Programed SQL functions, stored procedures, and agent Jobs for reporting.
- Manually deployed and implemented applications and databases for multiple customers.
- Developed technical documentation.

Education

- Western Governors University | 10/01/2011 - 09/30/2013 | Business Management
- Moorpark Community College | 2009 – 2010
